7 Clusters with 8 neighbors

n = 5381

8 Clusters with 8 neighbors

n = 5381

- Perform constrained hierarchical clustering with 8 neighbors and 7 clusters

Plotting the results from constraint hierarchical clustering

Conduct the pairwise MMD test and evaluate results

- Merge clusters 3,5,7 as one and 2,4 as another cluster

Plotting the re-partitioned clusters for sample 04

Application on Sample 05

Calculating the average modified silhouette scores for different neighborhood and cluster sizes.
